

G-TWYST

GM PLANTS TWO YEAR SAFETY TESTING

Stakeholder Forum Dialogue, Wien 16-12-2014

Introduction to the workshop

Huib de Vriend, LIS Consult, Driebergen

- Two blocks of presentations

1. Production of plant material MON810 and NK603
2. Analysis of plant material, storage and diet preparation
3. The test facility
4. Study design

1. Histopathology
2. Statistics and prospective power analysis
3. Data storage and access
4. Interlinkages with other research projects

- Questions for clarification after each presentation
- Discussion after each block of presentations
- General discussion at the end of the workshop

- Possibility to write questions, suggestions, remarks (and your name) on cards and pin those on a poster;
- Raise issues orally;
- Remember: Topics not dealt with (sufficiently) can be included in written comments after the workshop;
- Chair / Project leader will summarize the issues after each discussion

- Whole workshop will be recorded in order to facilitate reporting (for internal use only) – No persons/organizations will be quoted;
- Therefore mention your name and affiliation when asking questions, making suggestions or comments;
- Stupid questions or useless comments do NOT exist!;
- This is a mutual learning process: Let's make it an open exchange of viewpoints and suggestions.

- G-TwYST team will draft a report;
- Draft Report will be sent to participants for comments;
- Opportunity to file written comments by 9 Jan;
- Final report in March/April on public website.
